It is a pleasure to note that Prince Shri Venkateshwara Padmavathy Engineering College Chennai, India organise INTERNATIONAL CONFERENCE ON CONTEMPORARY ENGINEERING AND TECHNOLOGY on March 23rd - 24th, 2024. I understand there is very enthusiastic response to the Call for Papers both from within and outside the country. Conferences of this nature provide a platform to young researchers, faculty members and industry professionals to present their research and development work and get feedback and suggestions to improve their quality of work. This Conference will provide an opportunity to exchange ideas on latest algorithms, standards, technologies, and applications pertaining to above topics and thus serve very useful to students, teachers, and practicing industry professionals. I am sure the delegates will carry with them pleasant memories of the Conference. I wish the delegates very productive technical interactions and enjoyable stay.
